Data for Ballot Harvesting Analytics

Data for the Ballot Harvesting Analysis:

- **Source:**
<https://elections.sos.ga.gov/Elections/voterabsenteeefile.do>
- **Date Collected: 11/2/2020**
- **Scope: All 159 Counties in the State of Georgia**

Alleged Ballot Harvesting in Georgia

Statistical Analysis of Ballots Returned Versus Ballots Requested

- Ballot harvesting would result in either unusually high or low ballot return rate.
- Graph on the left is a logarithmic comparison of ballots requested versus ballots returned
- Statistical analysis of ballot return rates shows no anomalous points. No suspicious indicators of ballot harvesting.

Alleged Ballot Harvesting in Georgia

Analysis of Addresses Receiving More Than 20 Absentee Ballots

# Accepted Ballots	Mailing Address	County	Comment	Facility Type	No. with 20+ Ballots
84	504 COLLEGE DR ALBANY GA	Dougherty	College Dorm (Albany State)		
73	2001 S LEE ST AMERICUS GA	Sumter	Senior Center		
69	1762 CLIFTON RD NE ATLANTA GA	DeKalb	Emory University	Apartments	3
68	342 LOG CABIN RD NE MILLEDGEVILLE GA	Baldwin	Apartments	Boarding school	1
61	1501 MERCER UNIVERSITY DR MACON GA	Bibb	Mercer University	Health Care	6
61	4255 SMOKECREEK PKWY SNELLVILLE GA	Gwinnett	RV Park	Homeless Shelter	2
48	1014 CAVE SPRING RD SW ROME GA	Floyd	Darlington Boarding School	Jail	3
47	223 JAMES P BRAWLEY DR ATLANTA GA	Fulton	Clark Atlanta University	Monastery	1
43	830 WESTVIEW DR SW ATLANTA GA	Fulton	Morehouse College	RV Park	4
40	3219 COLLEGE ST THUNDERBOLT GA	Chatham	Savannah State University	Senior Living	8
				University	10

- Thirty-eight addresses received more than 20 absentee ballots in Georgia.
- Each one was analyzed to determine if it could be a potential incident of ballot harvesting.
- All the addresses correlated with a location that could plausibly receive multiple ballots (See table above right).
- No potential incidents of ballot harvesting were discovered using this analytical method.

Conclusions

- **Analysis of ballots requested versus ballots returned shows no statistical anomalies that would be associated with ballot harvesting**
- **Analysis of addresses receiving more than 20 absentee ballots shows addresses are multi-resident locations with the largest number (84) going to a college dormitory**
